

Public Health Expo 11

The Faculty of Public Health, Universitas Indonesia is the oldest Public Health Faculty among all the others in Indonesia. Currently in its 56th year of excellence, this faculty was formed to bring forth health workers that are well trained in the field of Public Health. These graduates then showcase their skills in tertiary institutions, provide expertise education in the field of public health for other college graduates, and also to provide further education for medical personnel who have passed the academy level such as health inspectors academies, nutrition academies, and nurse academies.

It's no wonder then, that the Faculty of Public Health, Universitas Indonesia is able to link up with many companies that are eager to house many of their graduates. One way for that connection to happen is through the Public Health Expo 11, an event held by the Student Executive Board of the Faculty of Public Health, Universitas Indonesia. This event is made up of many segments such as, Roadshow, Public Lecture, Explore Department, Essay Competition, and last but not least the Health Career Exploration.

The Roadshow is a way for high school students to know more about PHE 11 and the Faculty of Public Health. Bringing along the main issue for PHE 11 which talks about “The Role of the Public Health Profession in the Millennial Era”. The Public Lecture is held to raise awareness on how to live a healthy lifestyle the millennial way but through the perspective of public health. Explore Department is a segment that lets us know more about the different departments in Public Health, such as Epidemiology, Biostatistics, and so on. Furthermore, a national essay competition is held with the topic of this year’s main issue for PHE 11 that is “The Role of the Public Health Profession in the Millennial Era”. Lastly, and quite probably the most awaited segment of the event is the Health Career Exploration segment. This segment serves as a place for public health students to dig up and find out about their career potentials after they graduate.

The Health Career Exploration segment itself has three mini-events. Firstly there is the CV and LinkedIn Workshop. This workshop invites Tania Dian Permata Indah, S.E., M.M. (Head of Business Development Operation, Alodokter) and Julia Jasmine (Program Manager Youthmanual). Then, it is followed by a talk show with the theme of “Explore Your Potentials for The Future as Health Professional”. This talk show invites Noviaji Joko Priono, SKM (Environmental Health Safety Specialist) as their moderator and invites Dr. Cicilia Windiyaningsih SMIP, SKM, M.Kes (Chairperson of the Research Ethics Committee on Epidemiology, Universitas Respati Indonesia), Aghnia Dima Rochmawati, SKM (Project Implementation Officer UNDP), and also Euis Ratna Sari, SKM (Public Health Expert,

Pencerah Nusantara Program Batch 5, Center for Indonesia Sustainable Development Initiative (CISDI)) as the speakers. Lastly, there is the Agency and Institution Exhibition Booths.

This event invites many agencies and institutions on board, such as TopKarir Indonesia, Alodokter, YouthManual, United Nations Development Programme (UNDP), and Center for Indonesia Sustainable Development Initiative (CISDI).

- TopKarir Indonesia is a platform for young people who are seeking a job opening. They also provide us with tips and tricks on how to land the perfect job that is best suited with our strengths.
- Alodokter is an official partner of the Ministry of Health, Republic of Indonesia. It is the number one digital health platform in Indonesia with more than 26 million active users every month, and more than 30 thousand doctors who joined them.
- YouthManual is a website that provides a service for students to help plan their future careers. Its vision is to be a "link and match" between education and industry and to increase the nation's competitiveness in the 4.0 industrial era.
- UNDP is the UN's global development network. They are an organisation that advocates for change and connecting countries to knowledge, experience and resources to help people build a better life. The UNDP Indonesia helps support Indonesia's national priorities and the implementation of the Government's Medium Term Development Plan and other national and local development visions, strategies and plans.
- CISDI is a civil society organization with the main objective of creating an equal, empowered and prosperous Indonesian society with a healthy paradigm. CISDI's focus areas are strengthening health policy implementation in Indonesia, empowering youth and communities at the grassroots level, and advocating for mainstreaming the post-2015 development agenda. CISDI is also involved in several consultation projects with the Ministry of Health and UNAIDS.

All in all, this event is one worth the wait and there is much to be gained from joining the events that are held. The participants will receive an e-certificate and talk shows and workshop kits. They will also be exposed to opportunities for internships and work as well as

concrete knowledge and information related to careers in the health sector, especially public health.
