INTRODUCTION

Pusat Kajian Administrasi dan Kebijakan Kesehatan (PK-AKK) atau dalam Bahasa Inggris Center for Health Administration and Policy Studies (CHAMPS) was established on September 28, 2006 and confirmed by Letter of Decision No. 50 of 2006 from the Dean of the Faculty of Public Health University of Indonesia

The basic philosophy of establishing CHAMPS is to participate in doing improvement of health development efforts in Indonesia more practical especially for teaching staff in the Department of Administration and FKMUI Health Policy. This effort is deemed necessary considering the members of the Department of Health Administration and Policy are experts in Health Administration and Policy who abilities, knowledge and potential can be used to acceleration of the process of improving health development in Indonesia, through research, training, and consultation efforts with the government, companies, and society in Indonesia more broadly

dr. Adang Bachtiar, MPH, DSc

Head of Center for Health Administration and Policy Studies

COMPANY VISION

Purpose of Health Development

Health development is expected to solve problems health that is faced so that the health status of the community becomes increase. Therefore, the foundation of health development must be based on policy considerations that encourage the fulfillment of public health needs effectively, efficiently, equitably, and sustainable. In practice, such efforts should consider at three levels as follows:

- **System:** includes national and regional systems and policies as umbrella for all health policy products and efforts needed
- **Program:** includes priority problems and intervention programs that are suitable for improving and accelerating the achievement of goals health sector interventions, including the allocation of resources to support it
- **Organization:** includes program organization and institutional structure in order to work effectively, efficiently, evenly, and continuously in realizing program objectives and support the dynamics of the health system that is expected to work.
